ChunWei (Tracy) Chiang

Business Analyst | Data Analytics | SQL | Python | PMP

Hsinchu, Taiwan | druidtracy@gmail.com |https://www.linkedin.com/in/tracy-chiang-2b0844356/

Education

Master of Science in Public Health, Chung Shan Medical University, Taiwan (2006 - 2009)

- Statistical Analysis: Descriptive & Inferential Statistics, Hypothesis Testing, Regression Analysis
- Software: SAS, SPSS

Skills

- Programming Language: Python
- Data Analytics: NumPy, Pandas, Matplotlib, Scikit-learn, SQL, Advanced Excel
- Business Analytics: Executive Reporting, Decision Support
- Project Management: PMBOK, Project Planning & Execution, Cross-functional Collaboration

Certifications

- Project Management Professional (PMP)
- WBSA Business Planning Certification

Work Experience

Taiwan Rolling Stock Co. (Manufacturer of railway vehicles and components) 2013/08 – 2025/09

Business Planning & Analysis Specialist

- Conducted user interviews to understand reporting requirements and designed a structured data framework for a business with annual revenue of NT$200-400 million. Developed a semi-automated reporting process using Excel PivotTables and formulas to support data entry and performance reporting, reducing report preparation time from at least one week to one day.
- Conducted cross-functional interviews to identify cost-generating activities, then designed and implemented a standardized cost classification framework in the company's ERP system. Embedded the classification into the procurement process, enabling structured cost data collection and monthly analysis for projects ranging from NT$20 million to NT$3 billion, improving earlier visibility into project spending and supporting ongoing cost control.
- Consolidated cost data for large-scale government tenders with budgets exceeding NT$6 billion, supporting bid pricing, project budget planning, and analysis of projected revenue and gross margin.
- Synthesized business performance and anticipated revenue and gross margin data into senior management reports, supporting financial planning and board-level reporting.

Ministry of Health and Welfare (Taiwan Government Agency) 2009/03 – 2013/07

Statistical Analyst

- Extracted and processed data using SAS, including data cleaning and dataset preparation.
- Conducted descriptive and inferential statistical analysis to support policy and operational decisions.
- Communicated statistical findings and metric definitions to business users, improving data understanding and usability
